**(54) FISHING ROD WITH
TELESCOPE**

(57) Abstract:

PROBLEM TO BE SOLVED: To obtain a fishing tool excellent in visibility, capable of surely watching the strike of a fish by a small mark such as fly even from a distance and making a person inferior in eyesight enjoy oneself in fly fishing.

SOLUTION: A telescope 4 is equipped with a leg part 3 and a part right before a grip 7 of a fishing rod 1 is provided with an engaging and fixing part 2 integrally with the leg part 3. The engaging and fixing part 2 are furnished with opposed fitting pads 10a and 10b at the front and rear of a stabilizer 9, one of the pad 10a is fixed to the stabilizer 9 and the other pad 10b is slid on the surface of the stabilizer 9 so that a T-shaped connecting part 11 fitted to the leg part 3 can be fastened and fixed.
